

Combinated MEDIAGON

Limescale and corrosion protection

Vitalization of water

operation

Mains water flows through a multitude lines of magnetic fields and static very fine and so is polarized several times. this so it no longer formed agglomerates and concretions, but apparently only a residue softer which is easily removed by means of a brush or cloth. Existing layers hard limestone can slowly dissolve.

Protection against limescale

Mediagon reduces the formation of new deposits cal-hard gage in pipes and water heaters and pro-follows the life of the facility. Lines and static magnetic fields are so finely arranged that the ferruginous particles can not adhere to the pipe wall. There are only advantages to install this device that are demand or energy, or maintenance.

vitalized water

Le drank water is vitalized restore its strength and its original nature, as if it came from a fresh and clear source, in a world that would not yet undergone the pollution generated by humans.

Mediagon gives water a new force

The effect of Mediagon technology has been tested by several independent sources. It has been shown vitalised water that has a proven positive effect on organic mechanism and is highly recommended for healthy nutrition and body care.

Easy installation and clean

The device consists of two half-shells that fit over the pipe Water inlet. The installation is carried-
~~Sée without cutting the pipe. the~~
horizontally mounting is possible and vertically either before or after the water meter at a location right (without connection), at least 16 cm for the standard device or 8 cm minimum for ZH special type device.

upstream

downstream

Respect for the environment:

- no additive chemicals
- no energy

advantageous:

- no maintenance service
- no electricity or maintenance cost
- the right to exchange for one year
- 10 years warranty (depending guarantee card)

Test before you buy

Mediagon can be tested without commitment for 4-6 weeks. Our specialists have extensive experience in the field of the fight against limescale problems. They are at your disposal for further information.
